WisdomTree Company Overview¹

+ Who We Are

WisdomTree is a global asset manager with a track record of innovation, competitive performance and thought leadership since 2006. WisdomTree is headquartered in New York and has over 200 employees globally.

+ WisdomTree Solutions

WisdomTree manages \$57.6 billion across innovative solutions that are designed to meet investors' needs across asset classes and market cycles.

+ Investment Philosophy & Approach

Our belief that a fundamentally weighted approach can produce attractive returns with less risk and expense than active management made us a pioneer in factor-based investing.

+ What We Can Deliver

Our investment strategies are delivered through ETFs which can provide intra-day liquidity, transparency, and tax efficiency.

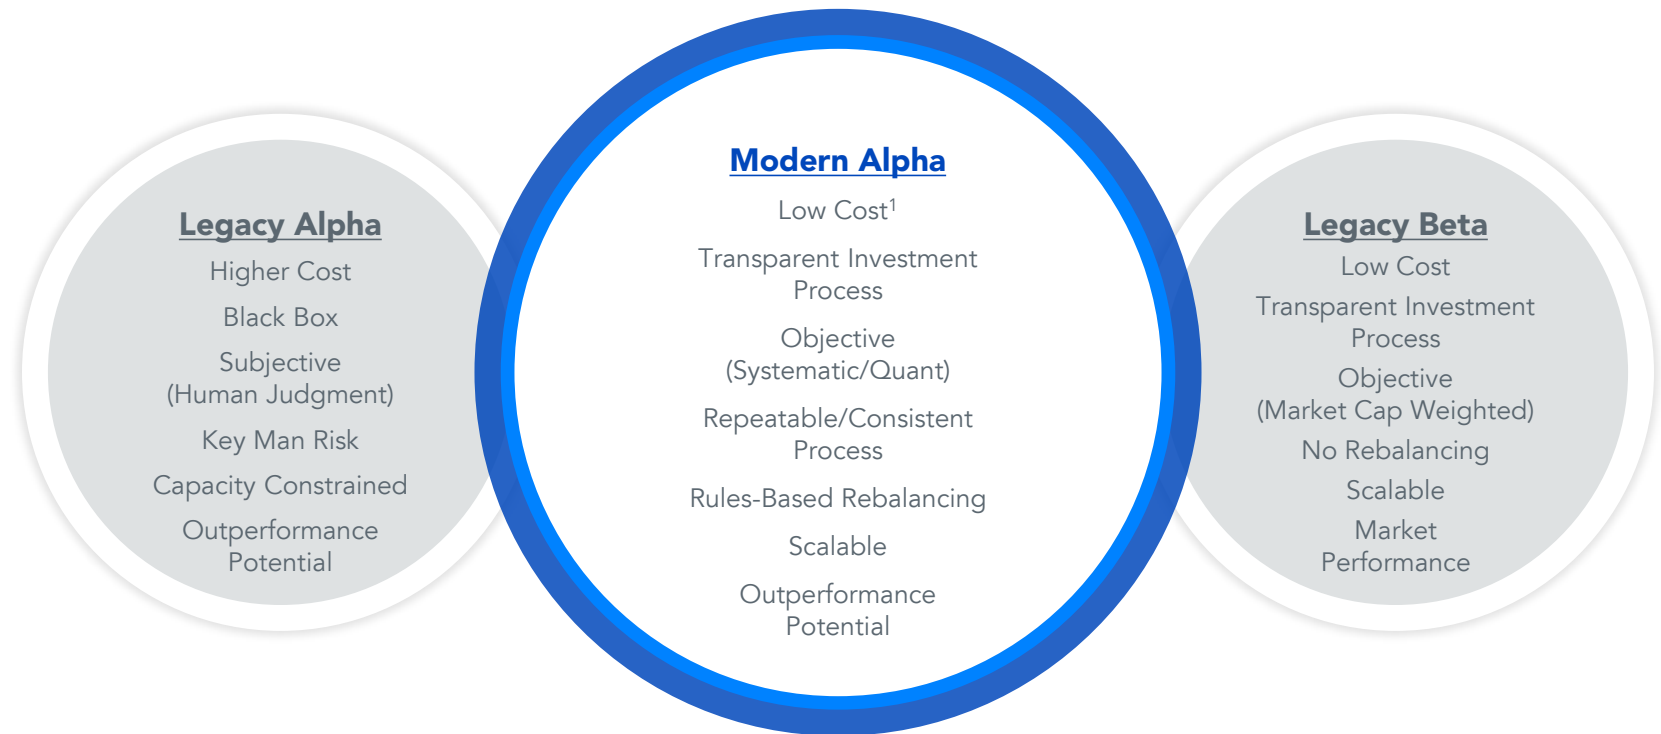

All data as of 6/30/2020. ¹WisdomTree Investments, Inc., through its subsidiaries in the U.S. and Europe (collectively "WisdomTree").

Our Philosophy

- ▶ Market Cap Weighting is Flawed
- ▶ Pricing Errors & Return Premiums Exist
- ▶ Fundamentals Matter
- ▶ The Concept of Relative Value is Important

WisdomTree Modern Alpha®

Modern Alpha combines the outperformance potential of active with the benefits of passive—to offer investors strategies that are built to perform

¹Ordinary brokerage commissions apply.

Thoughtful Exposure Across All Asset Classes

At WisdomTree, we do things differently

Each of our strategies is designed to redefine either how an investment is built or how a country or asset class is accessed, creating what we believe is a better investing experience

Why Dividends for Value?

- + Dividends have provided the majority of the stock market's real return over time.
- + Dividends can provide downside protection during market bubbles.
- + Dividends are an unambiguous objective measure, cannot be restated and can be applied globally.

Source: Professor Jeremy Siegel, *The Future for Investors* (2005), source updated for 2019 data. Uses the S&P 500 universe as of 12/31/19. Average annual total returns, 1957–2019. Each stock in S&P 500 is ranked from highest to lowest by dividend yield on December 31 of every year and placed into “quintiles,” baskets of stocks, with 100 stocks in each basket. The stocks in the quintiles are weighted by their market capitalization. Top and bottom quintiles are shown for simplicity. The dividend yield is defined as each stock's annual dividends per share divided by its stock price as of December 31 of that year. p.a.=per annum. Past performance is not indicative of future results. You cannot invest directly in an index. Index performance does not represent actual fund or portfolio performance. A fund or portfolio may differ significantly from the securities included in the index. Index performance assumes reinvestment of dividends but does not reflect any management fees, transaction costs or other expenses that would be incurred by a portfolio or fund, or brokerage commissions on transactions in fund shares. Such fees, expenses and commissions could reduce returns.

You cannot invest directly in an index. Performance is historical and does not guarantee future results. Current performance may be lower or higher than quoted. Investment returns and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Performance data for the most recent month-end is available at wisdomtree.com. WisdomTree shares are bought and sold at market price (not NAV) and are not individually redeemed from the Fund. Total Returns are calculated using the daily 4:00 p.m. EST net asset value (NAV). Market price returns reflect the midpoint of the bid/ask spread as of the close of trading on the exchange where Fund shares are listed. Market price returns do not represent the returns you would receive if you traded shares at other times.

Why Earnings For Core?

- + Helps manage valuations to ensure investors don't overpay for the market
- + Helps magnify the effect earnings have on performance while reducing overall P/E ratios
- + Avoids more speculative parts of the market

Source: Jeremy Siegel, *The Future for Investors* (2005), for the period 12/31/1957 to 12/31/2019. Universe: S&P 500 Index. Average annual total returns, 1957-2019. Each stock in S&P 500 is ranked from highest to lowest by P/E ratio on December 31 of every year and placed into "quintiles," baskets of stocks, with 100 stocks in each basket. The stocks within each quintile are weighted by their market capitalization. Top and bottom quintiles are shown for simplicity. The P/E Ratio is defined as share price divided by earnings per share. Lower numbers indicate an ability to access greater amounts of earnings per dollar invested of December 31 of that year. Past performance is not indicative of future results. Why We Focus on Quality

- + Higher operating profitability (i.e., higher quality) has outpaced lower quality over time.
- + A quality factor ensures companies in the portfolio are healthy and can deliver results over time.
- + Our proprietary methodology identifies forward-looking dividend growth potential as a way of defining quality.

You cannot invest directly in an index. Performance is historical and does not guarantee future results. Current performance may be lower or higher than quoted. Investment returns and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Performance data for the most recent month-end is available at wisdomtree.com. WisdomTree shares are bought and sold at market price (not NAV) and are not individually redeemed from the Fund. Total Returns are calculated using the daily 4:00 p.m. EST net asset value (NAV). Market price returns reflect the midpoint of the bid/ask spread as of the close of trading on the exchange where Fund shares are listed. Market price returns do not represent the returns you would receive if you traded shares at other times.

Our Unique Approach to Emerging Markets

- + Using our Modern Alpha approach, we take the government out of some of our emerging markets strategies
- + Government ownership has negatively impacted operational performance
- + We've created funds to broadly represent emerging markets opportunity sets outside state-owned enterprises (SOEs)

Standardized Annual Returns as of 6/30/2020

	1 Year	3 Year	5 Year	10 Year	Since 12/31/07
Non-SOE	-0.19%	2.48%	4.73%	5.05%	2.31%
SOE	-24.04%	-3.22%	-2.88%	-0.44%	-2.45%

Sources: WisdomTree, FactSet, Bloomberg, 12/31/07–6/30/2020. Universe of securities is the MSCI Emerging Markets Index, whose performance is split between state-owned & non-state owned. Returns are calculated in U.S. dollars. Past performance is not indicative of future results. You cannot invest directly in an index. State-owned enterprises are defined as government ownership of more than 20%. Constituents identified as state-owned by WisdomTree removed the SOE securities from the MSCI EM Index.

Our Unique Approach to Fixed Income

- + We believe it's possible to enhance yield without taking on additional risks.
- + Most fixed income indexes assign more weight to companies—or government entities—that are issuing more debt; this seems counterintuitive to us.
- + Traditional interest rate funds add cash and shorten maturities—WisdomTree seeks to preserve the current coverage and diversification while reducing exposure to interest rate risk.
